## 6. Different brands

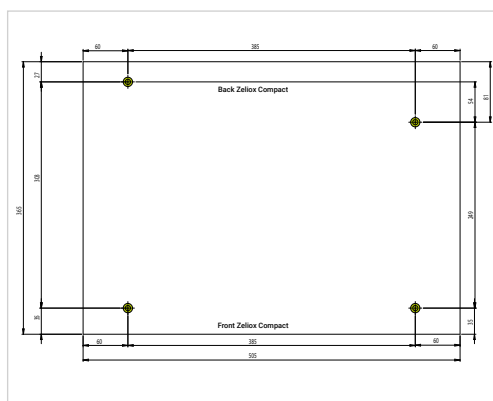

### Follow these steps for correct installation

#### **WARNING:**

- Do not place the Zeliox Compact upside down or on its back.

1. All cables should be prepared and routed according the local regulations.

2. Use the measurements for placing the Zeliox Compact. The 4 mounting holes should be located according to drawing, 7mm round. The minimum required space around the Zeliox is shown as solid line.

3. Make sure the air intake and outlet are free. Use M6 bolts.

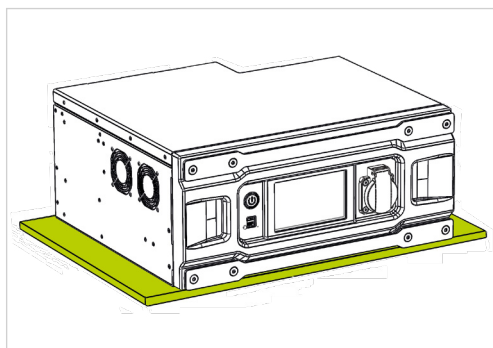

4. Place 4 spacers (5mm) in between the surface and the underside of Zeliox Compact.

5. Make sure the cable section and the Earth Leakage Switch at the back of the Compact are serviceable, and the cables do not kink.

6. See User & Installation Manual page 25 for further instructions.

7. Connect the cables to the Zeliox Compact.

8. Zeliox Compact is ready for use.
